Subject index

Basic Data for Materials Modification and Analysis

A general overview of positron collision physics, R.J. Drachman 143 (1998) 1
Positron scattering from magnesium, R.I. Campeanu, R.P. McEachran, L.A. Parcell and A.D. Stauffer 143 (1998) 21
Relativistic close-coupling calculations of positron scattering from the heavy alkalis, X. Feng, R.P. McEachran and A.D. Stauffer 143 (1998) 27
On the study of the critical angle in elastic positron–hydrogen collisions, P. Mandal, S. Kar and U. Roy 143 (1998) 32
Positron scattering from neon, L.A. Parcell, R.P. McEachran and A.D. Stauffer 143 (1998) 37
Positron collisions with one- and two-electron atoms, C.P. Campbell, M.T. McAlinden, A.A. Kernoghan and H.R.J. Walters 143 (1998) 41
Measurements of positron–molecule differential scattering cross-sections, D.A. Przybyla, W. Addo-Asah, W.E. Kauppila, C.K. Kwan and T.S. Stein 143 (1998) 57
Positron–molecule scattering experiments, C.K. Kwan, W.E. Kauppila, S. Nazaran, D. Przybyla, N. Scahill and T.S. Stein 143 (1998) 61
Measurements of positron scattering by hydrogen, alkali metal, and other atoms, T.S. Stein, M. Harte, J. Jiang, W.E. Kauppila, C.K. Kwan, H. Li and S. Zhou 143 (1998) 68
Optical potentials for positron scattering: A simple modelling for atomic targts, F.A. Gianturco and R. Melissa 143 (1998) 81
Positron impact ionisation of atoms, V. Kara, K. Paludan, J. Moxom, P. Ashley and G. Laricchia 143 (1998) 94
Electron ejection from ionising positron–atom collisions, A. Kövér, G. Laricchia and R. Finch 143 (1998) 100
Positron impact ionisation of rare gas atoms by a distorted wave method with close coupled target states, D.L. Moores 143 (1998) 105
Fragmentation and ionization of CH_3F by positron and electron impact, J. Moxom, J. Xu, G. Laricchia, L.D. Hulett, D.M. Schrader, Y. Kobayashi, B. Somieski and T.A. Lewis 143 (1998) 112
Four and five photon decay from positronium and the lifetime problem, M. Chiba, R. Hamatsu, T. Hirose, M. Irako, T. Kumita, T. Matsumoto, S. Matsuo, T. Nishimura and J. Yang 143 (1998) 121
Annihilation in low energy positron–helium scattering, J.W. Humberston and P. Van Reeth 143 (1998) 127
On the annihilation of positrons in binary encounters with molecules, G. Laricchia and C. Wilkin 143 (1998) 135
Annihilation dynamics of positrons in molecular environments, E.P. da Silva, J.S.E. Germano, J.L.S. Lino, C.R.C. de Carvalho, A.P.P. Natalense and M.A.P. Lima 143 (1998) 140
Production of positronium in ground- and excited-states from positron–lithium scattering, S.Y. El-Bakry and M.A. Abdel-Raouf 143 (1998) 149
Positronium beam scattering from atoms and molecules, A.J. Garner, A. Özen and G. Laricchia 143 (1998) 155
Theory of positronium-atom scattering, A.S. Ghosh, P.K. Sinha and H. Ray 143 (1998) 162
Positronium spin flip cross section with O_2: Comparison with muonium spin exchange, M. Senba and R.A. Dunlap 143 (1998) 170
Hidden crossing theory applied to positronium formation, S.J. Ward, J.H. Macek and S.Y. Ovchinnikov 143 (1998) 175
Relativistic corrections to the binding energy of Ps^-, A.K. Bhatia and R.J. Drachman 143 (1998) 195
Investigation of the binding of a positron to magnesium and zinc atoms, R.P. McEachran and A.D. Stauffer . 143 (1998) 199
Stabilization of matter–antimatter atoms in crossed electric and magnetic fields, P. Schmelcher, J. Ackermann and J. Shertzer 143 (1998) 202
Bound states of positrons with atoms and molecules: Theory, D.M. Schrader 143 (1998) 209
Hydrogen–antihydrogen interactions, E.A.G. Armour and J.M. Carr 143 (1998) 218
Anti-proton and proton impact excitation–ionization of helium including resonant decay, J.C. Straton, J.H. McGuire and A.L. odunov 143 (1998) 225
Absolute thick-target gamma-ray yields for the light elements induced by ^{12}C, ^{14}N and ^{16}O ions, A. Seppälä, J. Räisänen, E. Rauhala and Z. Szökefalvi-Nagy 143 (1998) 233

0168-583X/97/$ – see front matter © 1997 Elsevier Science B.V. All rights reserved

The $^{11}B(p,\alpha_0)^8Be$ nuclear reaction and $^{11}B(p,p)^{11}B$ backscattering cross sections for analytical purposes, M. Mayer, A. Annen, W. Jacob and S. Grigull 143 (1998) 244
Photon production using a low energy electron expansion of the EGS4 code system, L.M.N. Távora and E.J. Morton 143 (1998) 253
State selective Rydberg charge transfer and ionization in low energy ion–atom collisions, A.N. Perumal and D.N. Tripathi 143 (1998) 429

Atomic Collisions in solids

Fluctuations in collision cascades with a realistic scattering model, R. Chakarova and I. Pázsit 143 (1998) 272
Experiment and simulation of cluster emission from 5 keV Ar → Cu, T.J. Colla, H.M. Urbassek, A. Wucher, C. Staudt, R. Heinrich, B.J. Garrison, C. Dandachi and G. Betz 143 (1998) 284
Simulation of keV clusters incident on gold targets, A.M. Childs, M.H. Shapiro and T.A. Tombrello 143 (1998) 298
Angular and impact parameter dependent electron emission in collisions of swift bare and screened heavy ions with gaseous targets , U. Bechthold, S. Hagmann, J. Ullrich, B. Bathelt, G. Kraft and H. Schmidt-Böcking 143 (1998) 441
MD simulation of atomic displacements in pure metals and metallic bilayers during low energy ion bombardment at 0 K, G.V. Kornich and G. Betz 143 (1998) 455
The broadening of energy spectra of atoms scattered by a solid surface under molecular ion bombardment, I.A. Wojciechowski, M.V. Medvedeva, V.Kh. Ferleger, K. Brüning and W. Heiland 143 (1998) 473

Ion Beam Modification of Materials

Inner surface ion implantation using deflecting electric field, A. Liu, X. Wang, Q. Chen, B. Tang and P.K. Chu 143 (1998) 306
X-ray reflectivity investigation of near-surface density changes induced in Al–Au multilayers by high-current ion beam bombardment, A. Markwitz, F. Prokert, M. Waldschmidt and G. Demortier (*Letter to the Editor*) . . 143 (1998) 422
XPS investigation of niobium implanted into sapphire after annealing in reducing atmosphere, N.K. Huang, B. Tsuchiya, K. Neubeck, S. Yamamoto, K. Narumi, Y. Aoki, H. Abe, A. Miyashita, H. Ohno and H. Naramoto 143 (1998) 479
The solid film lubrication by carbon ion implantation into α-Al_2O_3, Tian Jun, Wang Qizu and Xue Qunji 143 (1998) 488
XRD, ESCA and *C–V* investigations of Al_2O_3 SiO_2 composite thin films synthesized by high dose oxygen ion implantation, S.K. Dubey and A.D. Yadav 143 (1998) 493
Low temperature ion beam synthesis of $NiSi_2$ layers with fine electrical property, K.Y. Gao and B.X. Liu 143 (1998) 499

Effects of Radiation

Role of particle charge in impact ionization by charged microparticles, M.J. Burchell, M.J. Cole and J.A.M. McDonnell 143 (1998) 311
Damage creation in α-Al_2O_3 by MeV fullerene impacts, S.M.M. Ramos, N. Bonardi, B. Canut, S. Bouffard and S. Della-Negra 143 (1998) 319
Damage accumulation and annealing in 6H–SiC irradiated with Si^+, W. Jiang, W.J. Weber, S. Thevuthasan and D.E. McCready 143 (1998) 333
Surface tracks by MeV C_{60} impacts on mica and PMMA, M. Döbeli, F. Ames, C.R. Musil, L. Scandella, M. Suter and H.A. Synal 143 (1998) 503
Molecular dynamics study of non-equilibrium energy transport from a cylindrical track I. Test of "spike" models, E.M. Bringa and R.E. Johnson 143 (1998) 513
Radiation tolerance tests of components for the FERMI microchip module, J. Molnár, A. Fenyvesi, G. Dajkó, J. Végh, A. Kerek and D. Novák 143 (1998) 536
Photoinduced trapping of xenon in polymeric films at ambient temperature, D. Castella, D. Corminboeuf, J.-Cl. Dousse, J. Hoszowska and J. Kern 143 (1998) 547
Quantitative α-particle detection in a homogeneous medium with LR115, A. Pape, J.C. Adloff, R. Barillon, A. Haessler, A. Hoernel, A. Nourreddine, D. Oster and D. Weidmann 143 (1998) 557

Analysis of Materials

Relaxation of strain during solid phase epitaxial growth of Ge^+ ion implanted layers in silicon, G. Holmén and P. Songsiriritthigul 143 (1998) 342

$^{12}C(\alpha,\alpha)^{12}C$ resonant elastic scattering at 5.7 MeV as a tool for carbon quantification in silicon-based heterostructures, M. Berti, D.D. Salvador, A.V. Drigo, F. Romanato, A. Sambo, S. Zerlauth, J. Stangl, F. Schäffler and G. Bauer 143 (1998) 357
High resolution elastic recoil detection analysis of polystyrene depth profiles using carbon ions, M. Geoghegan and F. Abel 143 (1998) 371
Application of thin layer activation technique for surface wear studies in Zr based materials using charged particle induced nuclear reactions, D.P. Chowdhury, S. Pal, R. Parthasarathy, P.K. Mathur, A.K. Kohli and P.K. Limaye 143 (1998) 381
Studies on the 30–450°C thermoluminescence of synthetic mullite, B. Yang, P.L. Leung and M.J. Stokes 143 (1998) 389
Implantation of ^{7}Be radioactive tracer for wear measurements of polymers, T. Sauvage, O. Lacroix, G. Blondiaux and P. Boyer 143 (1998) 397
Quantitative PIXE analyses of ferromanganese oxide deposits from different locations of the Indian Ocean and a deposit from the Pacific Ocean, R.K. Dutta, M. Sudarshan, S.N. Bhattacharyya, V. Chakravortty and S.N. Chintalapudi 143 (1998) 403
Absolute mass thickness determination of thin samples by X-ray fluorescence analysis, R.A. Barrea, S. Bengió, P.A. Derosa and R.T. Mainardi 143 (1998) 561
Proton resonance reactions using thick targets in inverse kinematics, A. Huerta Hernández, C. Solís Rosales, M.E. Ortiz, E.R. Chávez Lomelí, J. Gomez del Campo and D. Shapira 143 (1998) 569
Interlaboratory comparison of positron and positronium lifetimes in polymers, C. Wästlund, M. Eldrup and F.H.J. Maurer 143 (1998) 575
Erratum to: "Magnetic texture determination by means of the monochromatic circularly polarized Mössbauer spectroscopy" [Nucl. Instr. and Meth. B 134 (1998) 405], K. Szymański (*Erratum*) 143 (1998) 601

Ion Sources and Beam Optics

Review of positron beams, M. Charlton 143 (1998) 11
An electrostatic beam for positron–gas scattering measurements, H. Gao, A.J. Garner, J. Moxom, G. Laricchia and Á. Kövér 143 (1998) 184
New source of ultra-cold positron and electron beams, C. Kurz, S.J. Gilbert, R.G. Greaves and C.M. Surko . . 143 (1998) 188

Experimental Methods and Equipment

An improved prompt gamma neutron activation analysis facility using a focused diffracted neutron beam, K.J. Riley and O.K. Harling 143 (1998) 414
Fullerene nanotubes can be used when transporting gamma-quanta, neutrons, ion beams and radiation from relativistic particles, G.V. Dedkov 143 (1998) 584
New apparatus for performing perturbed-angular-correlation spectroscopy on epitaxially grown III–V surfaces, J.M. Adams, G.L. Catchen, D. Loubychev, J. Fu and D.L. Miller 143 (1998) 591

Letter to the Editor

X-ray reflectivity investigation of near-surface density changes induced in Al–Au multilayers by high-current ion beam bombardment, A. Markwitz, F. Prokert, M. Waldschmidt and G. Demortier 143 (1998) 422

Errata

Erratum to: "Magnetic texture determination by means of the monochromatic circularly polarized Mössbauer spectroscopy" [Nucl. Instr. and Meth. B 134 (1998) 405], K. Szymański 143 (1998) 601
